<p>Address</p>	<p>R. Riachuelo, 1098 - Sala 1101 - Centro Hist�rico, Porto Alegre - RS, 90010-270</p>
<p>Activities</p>	<p>We solve complex pricing problems with high volumes of data using Artificial Intelligence. Our algorithms learn how the demand of each product responds to price movements and leverage this elasticity effect to recommend prices that capture margin and volume. APRIX CORP: AI based pricing solution to optimize pricing decisions in big companies. APRIX DATA: Price data collection through web scraping.</p>
<p>Presentation of the company</p>	<p>Our mission is to develop data science solutions that help agents of different sizes and segments to solve problems in the search for greater efficiency. Our team is composed of data scientists, developers and engineers who graduated from the best engineering schools in Brazil and in France such as Ecoles Centrales, Polytechnique, Grenoble INP. We help companies like Ambev, Ipiranga, Porto Seguro, Vibra to make more efficient pricing decisions.</p>
<p>World presence</p>	<p>Brazil</p>
<p>Jobs and internships description</p>	<p>Machine Learning Engineer The mission of a Machine Learning Engineer is to contribute to the development and improvement of all processes behind our applications. Your mission will include collecting, processing and storing large amounts of data (through web scraping applications); data cleaning; monitoring and improving our forecasting models; developing new features for our products. In this opportunity you will learn Python, SQL, Git and Agile methodologies. We are looking for a fast learning, autonomous, challenge-oriented person! You must be somewhat familiar with coding and enjoy this</p>

	<p>activity. It will be nice if you already have some knowledge in Python/Git /SQL.</p> <p>Fullstack Developer Engineer A Fullstack Developer’s mission is to take part in the development process of our digital products; plan, implement, develop automated tests and perform functionality deployment on both front-end and back-end. You will have contact with all phases of development, from requirement gathering with all stakeholders until delivery. In this opportunity you will learn Angular, Javascript, HTML, CSS, Node.js, Python and SQL. We are looking for a fast learning, autonomous, challenge-oriented person! You must be somewhat familiar with coding and enjoy this activity. It will be nice if you already have some experience with front-end frameworks and/or full stack developer experience.</p> <p>Business Analyst (Product Development track) The mission of a Business Analyst (Product Development track) is to support the definition and execution of the strategic product roadmap; help describe technical tasks to the Dev team; participate in strategic product discussions; create and track metrics on product development and use; build organizational methodologies, metrics, KPIs, among others; conduct meetings with customers; conduct product validations. You are expected to quickly learn about Agile methodologies, AI technologies and digital products development. We are looking for a fast learning, autonomous, challenge-oriented person! The profile for an exceptional Business Analyst is someone able to succeed in multidisciplinary projects. We expect someone with great communication skills and who has the ability to comprehend complex technical problems and think of solutions.</p>
