QIMA Campus Recruitment

QIMA is a global provider of quality control and compliance services that helps brands and retailers manage their supply chains. Every year, we deliver some 400,000 product inspections, factory audits and lab testing. Founded in Hong Kong under the name AsiaInspection, QIMA now employs more than 4,000 employees in over 40 offices and labs and operates in 95 countries.

Since day one, we digitized the Testing, Inspection and Certification industry by taking it online. We invested heavily in our tech teams in Asia, Europe and the Americas, to build applications that allow our clients to quickly and easily manage their quality and compliance data.

Over the years we have expanded to cover the needs of clients in the consumer goods, food and life sciences sectors, either by developing our own services or through external acquisitions.

In 2018, we changed our name from AsiaInspection to QIMA, to better reflect our global offering and the tech-enabled services.

- An alumni of Arts & Métiers Paris Tech.
- Founded the company in 2005.

Jobs and internships description

Job title: Operations Project Manager

Are you passionate about continuous improvement and willing to take a step into a global player within the Quality Control and Supply Chain industry? Do you want to develop your career in an international working environment while building a high-scale Lean culture? If this sounds like you, this role will provide you full management exposure to progress your career.

You will be responsible for process optimization projects and/or management of multicultural teams. This will give you the opportunity to discover our business, our culture and our customers, while contributing to the development of our activities.

After 12 to 18 months of successful achievements, you will take the Management of one of our Business Unit.

- **Acting as a trainer and coach**, providing technical support and guidance to technical teams and conduct performance evaluations and on-site audits;
- Building a culture of **continuous improvement** across all Operations functions;
- Partnering closely with Managers to identify gaps and propose effective solutions to deal with daily and high-level challenges;
- Deploying SOPs and policies to **drive key projects** and act as continuous improvement leader to drive best practices;
- Implementing adequate **reporting tools** to measure Key Performance Indicators across Operations team;
- Ensuring the **projects are tracked** and results are maintained, communicated and summarized;
- **Manage a team**, depending on business opportunities across APAC region;
- Other jobs assigned by management.

More than 4,000 employees in over 40 offices and labs and operates in 95 countries.
